Questions and Answers on the Referendum

Here's what's to be voted on in the referendum November 23—

1. Are you in favor of quotas for three years?
2. Are you opposed to quotas for three years but favor the quota for one year?
3. Are you opposed to any quota?

1. Question- How has the European war affected the fire cured tobacco situation?

Answer: In the past, about 60 per cent of fire cured tobacco has been exported. With all Europe geared to a military economy, and sea lanes closed by blockade, exports for fire cured tobacco have practically disappeared and will remain at extremely low levels for the duration of the war. Exports dropped from 65 million pounds for the year ending October 1, 1939, to an estimated 39 million in 1940. Present world conditions indicate an export market for not over 20 million pounds for 1941. There is little prospect of regaining substancial quantities of the European market after the war ends.

Question— Is an increase in domestic consumption likely to make up for loss of exports?

Answer: Only about 40 per cent of the fire cured crop has been consumed in this country. Declines in the use of chewing tobacco and Italian type cigars have resulted in some loss in domestic consumption. In recent years, however, domestic consumption has remained fairly stable.

Question— Does the 1940 crop exceed current consumption and exports?

Answer: Yes, substancially. Even with a 1940 crop estimated at 96 million pounds, it is probable that production this year will exceed domestic consumption and exports for the coming year by 35 million pounds.

Question— What is the present supply of fire cured tobacco?

Answer: With an estimated carry over as of October 1, 1940, of 145 million pounds and a 1940 crop of 96 million pounds, total fire cured supply reaches 241 million pounds.

Question— Is this supply excessive?

Answer: Yes. This supply is about 3 1-2 times estimated consumption and exports for 1941.

Question— How can growers avoid extremely low prices for fire cured tobacco?

Answer: Under present conditions it will be necessary for growers to reduce plantings, if disastrously low prices are to be avoided not only for future crops, but also the 1940 crop.

Question— What are some of the advantages of marketing quotas?

Answer: Marketings are adjusted to demand and growers get better prices. Non -cooperating growers cannot take advantage of cooperating growers. Necessary adjustments in marketings are made uniformly by all growers.

Question— Will loans be used to support prices if marketing quotas are approved by growers?

Answer: Yes. The approval of quotas by growers would indicate their intention to bring supplies in line with demand and a loan would be made on the 1940 crop at the 1939 rate.

Question— Will loans be made if marketing quotas are not approved by the growers?

Answer: There would be no provision for making loans on the 1940 crop if growers do not approve quotas.

Question— If marketing quotas are in effect for fire cured tobacco in 1941, will they be based on acres or pounds?

Answer: Quotas will be on an acreage basis: Producers who plant within their acreage allotments may market their entire 1941 production without penalty.

Question— What will be the individual farm marketing quota?

Answer: The production on the farm's acreage allotment.

Question— Would less reduction in 1941 farm allotments be needed with three-year quotas?

Answer: Yes. If quotas are approved for three years, no 1941 farm allotments would be reduced more than 25 per cent from the 1940 farm allotment. If quotas are disapproved or approved for one year only, this adjustment from the 1940 farm allotment would be 33 1-3 per cent.

Question— What is the penalty for marketings in excess of the farm quota?

Answer: The penalty on all marketings in excess of the farm quota is 5 cents a pound. Penalties are collected beginning with the first sale of tobacco.

Question— Will there be any transfer of marketing quotas or sale of marketing cards?

Answer: No. Since co-operating growers can sell all of their tobacco there will be no transfer of marketing cards. This means a simplified program for co-operating growers while at the same time, the enforcement provisions are strengthened with respect to non cooperating growers.

Question— Can a non cooperator evade the penalty by selling his tobacco early?

Answer: No. The crop is subject to the marketing quota provisions regardless of whether or not it is sold before October 1, the beginning of the marketing year. In effect, the marketing year begins with the first sale of any tobacco from that year's crop.

Question— What happens if a grower permits to be sold on his marketing card tobacco grown on another farm?

Answer: The allotments for both farms will be reduced in the next year by the amount of tobacco so marketed. Also the farmer marketing the tobacco becomes liable for the penalty.

NOTICE

Notice is hereby given that the National Park Service has requested the closing of a section of State Route 24 through the Appomattox Battlefield for approximately one mile, and open in lieu thereof a new road for a distance of 6500 feet; this being necessary for a proper development of the Old Court House Site with various monuments. etc.

It is ordered by the State Highway Commission that under Chapter 212, Section 2, Acts of the General Assembly of 1926, the State Highway Commission grant the request of the National Park Service and close the present section of Route 24 through the Appomattox Battlefield ground when a new road has been opened in lieu thereof from near the Appomattox River, southwest for approximately 6500 feet.

Further, that any objection to closing of this section of road must be filed in writing in the office of the State Highway Commission, Richmond, Virginia, on or before twelve o'clock noon, December 24th. 1940.

H. G. Shirley,
Wade H. Massie, Secretary
S. W. Rawls.
J. F. Wysor,
Kenneth N. Gilpin,
STATE HIGHWAY COMMISSION OF VIRGINIA.
November 8, 1940.

Philadelphia Lawyer Needed for Radio License

If you ever get the idea that you would like to get a license from the government to operate a radio station—don't do it—unless you are prepared to answer hundreds of questions, intimate ones and other kinds and be prepared to place on exhibit scores of confidential papers ranging from your birth certificate to when your Aunt Mamie had her last operation. The Federal Communications commission requires the applicants to fill out a 41-page questionnaire.

If you or your wife has ever received a parking tag, you must so state; you must answer the question as to whether you or any person identified with the proposed radio station has ever been sued or any proceedings brought against you.

Was your dog ever picked up by a cop for letting him run loose? Are you divorced and if so, attach a copy of the divorce decree together with a complete record of the status of all your alimony payments. Other questions include "from what source did the fund for this investment come? what kind of programs are to be broadcast and how many sustaining programs will you have?"

According to one writer, the questionnaire appears to have been confected by a genius with a high sense of responsibility but who was not overlooking any bets.

Cosmic Phoenix' Stops Sun From Being Consumed

A few years ago, a new problem in connection with the sun—the fiery body 92,900,000 miles away from the earth—began to trouble many scientists. Astro-physicists figured that in radiating life-preserving heat and light, the sun burns up about 4,000,000 tons of its mass a second.

At that rate, it was at first argued, the sun should burn itself out within several thousand years. But there was strong evidence to indicate that it had been radiating for at least 5,000,000,000 years. As a result, it was concluded that somehow the sun kept burning without being consumed, being a sort of "Cosmic Phoenix" that perpetually reconstructed itself from its own ashes.

The problem, therefore, was to find out how this was done. Diligently, Prof. H. A. Bethe of Cornell university, Ithaca, N. Y., sought the answer. He announced at the annual meeting of the American Physical society in Washington that he had found it.

Professor Bethe's story was that the sun utilized its huge store of atomic energy to produce heat and light, and that carbon and hydrogen played the leading roles. As he saw it, the sun went through a six-phase cycle, during which its carbon, though seemingly consumed without pause by hydrogen flames, really emerged at the end of the cycle undiminished in quantity.

Laboratory experiments covering each phase of the cycle, Professor Bethe declared, proved that the sun could eat its carbon and have it too. What creates the sun's energy, he asserted, is the burning of its vast amount of hydrogen gas. The carbon merely acts as the releasing agent for the hydrogen. Thus, in the cycle, which Dr. Bethe estimated continues for 6,550,000 years and then repeats itself, part of the sun's hydrogen mass is depleted but none of its carbon mass is. He said the sun is equipped to radiate for another 12,000,000 years.

Leprosy Misconception Demolished by Author

Public opinion concerning leprosy is about where it was in the Middle ages, the department of public health has said, when it struck the coldest kind of terror to the hearts of men.

In an article by Emory Ross many of the current misconceptions anent leprosy are demolished. The article states that the disease is not highly contagious. Contrary to general thought, early cases of leprosy are not sent away, but are allowed to remain at home, to hold jobs, to mingle with the public, since the disease in its early stages can be permanently cured. Only the advanced cases are sent to the only hospital for leprosy in the United States, at Carville, La.

The specific mode of infection is not yet known. The lepra bacili is believed to breed in poverty-stricken and unsanitary places. After exposure the disease does not manifest itself for the following six years.

Proper nutrition, fresh air and exercise are the important elements in the treatment of lepra patients. Psychology also plays an important part, as in many cases progress in arrested cases results from restoring the patient's feeling of importance as a human being.

Voice of Abe Lincoln

All disputes and arguments, pro and con, as to the quality and style of voice Abraham Lincoln possessed can now be ended, according to the Chicago Tribune of March 11, 1861.

On that date, the Tribune printed the following article:

"His voice was as soft and sympathetic as a girl's. Altho not lifted above the tone of average conversation, it was distinctly audible thruout the entire hall. When after avowing his devotion to peace and conciliation, he said, 'But yet I fear we shall have to put the foot down firmly,' he spoke with deliberation and with a subdued intensity of tone, lifted his foot lightly, and pressed it with a quick but not violent gesture upon the floor. He evidently meant it. The hall rang long and loud with acclamations. It was some minutes before Mr. Lincoln was able to proceed . . . I have never seen an assemblage more thoroly captivated and entranced by a speaker than were his listeners yesterday by the grim and stalwart Illinoisan."

Stonewall Personals

Stonewall, Nov. 19.- The Stonewall 4H Club met at the school on Monday morning, and re-organized with officers as follows:

President, Henry Cabell;
Vice-president, Phyllis Drinkard;
Secretary and treasurer, Faye Weakley;
Song leader, Mrs. O. R. Turnes;
Leader, Miss Mary Mills.

The major project for 1941 will be home improvement. Each member will furnish one room in the home. Demonstrations chosen are making curtains, scarfs, rugs, mats, shoe racks, book ends, and door stops.

The club will have a recreational meeting in the form of a Christmas party, for the month of December.

Miss Edna Adcock was hostess to the Y. W. A.'s of Hebron Baptist church Friday evening. A very interesting program on the present condition in Europe was presented.

There was a good attendance, and two new members joined.

Delicious refreshments were served by the hostess, and Mrs. P. B. Stratton.

The Stonewall P.-T.A. held its regular monthly meeting on Friday evening at the school. Mrs. R.B. Martin had charge of the program.

Miss Jean Anderson spent a few days in Washington last week.

Miss Katherine Matthews spent last week- end at her home in Orange.

Misses Louise and Anne Carson and Rachel Chick spent Sunday with Miss Shirley Harding.

Mr. and Mrs S. E. Anderson, and Mr. and Mrs. R. D. Gunter visited Miss Lizzie Rice, who is critically ill at her home in Richmond.

Mr. and Mrs. P. B. Stratton and Misses Edna Adcock and Margaret Stratton were visitors in Blackstone Sunday.

Mr. and Mrs. W. A. Perrow and son, Robert, of Sherwill, spent Sunday with her father, R. L. Moore.

Mrs. O. R. Turnes attended the mission officers training day at the Centenary church in Lynchburg on Tuesday.

Mrs. Mott Perdieu spent Tuesday with Mrs. C. M. Stratton.

Phone 30 with Personals.

Oakville Personal Items

Oakville, Nov. 20.- Rev. Irving made a fine talk at the Oakville P.T.A. meeting last Wednesday night. His subject was Enriching the Spiritual Life of Youth.

Mrs. Houston Crowder, Curry Harvey and Miss Alice Smith, of Richmond, spent the week-end in the home of Mr. and Mrs. Jesse Harvey. Miss Vivian Clarke was a dinner guest in the same home on Sunday.

Miss Edythe Martin and Edgar Martin spent the week end in Roanoke.

Mr. and Mrs. Harold Rogers have a fine baby boy. Mr. and Mrs. Berkley Rogers and Mrs. Daisy Rogers called in the home Sunday afternoon.

Mr. and Mrs. W. S. Walton and family spent Sunday in the home of her parents, Mr. and Mrs. Davis, in Buckingham.

Catherine Doss spent the week end in the home of Tom Moore.

Miss Thelma Webb attended the funeral of her cousin, Jim Webb, Sunday.

We were sorry to hear of the death of Mrs. Spurgeon Coleman. She had many friends in this community.

Mr. and Mrs. Howlett Drinkard spent Sunday in the home of Ashby Martin.

Rev. and Mrs. Irving and family were Sunday dinner guests of Curry Abbitt.

Mr. and Mrs. Lewis Moore spent Sunday in the home of Clyde and Edwin Moore.

Mr. and Mrs. Carlyle Phelps spent Sunday in the home of Mr. and Mrs. Robertson at Bent Creek.

Leslie Gordon and sons, and L. T. Lucado spent Sunday in Washington, D.C.

Mr. and Mrs. Bennett Harding, John Harding, Ila and Garland Harding and Mr. and Mrs. Otha Wells and son spent Sunday in Lynchburg with Mr. and Mrs. Aubry Drinkard.

Mr. and Mrs. Walter Moore and daughters spent Sunday in the home of Mrs. Minnie Burks.

Mr. and Mrs. W. A. Owen and son, and Miss Abbott, of Concord, spent Sunday in the home of T.E Owen.

Miss Augusta Bingham is spending this week with her cousin, Mrs. Elmo Wilkerson. Mr. and Mrs. Eral Wilkerson called in the same home.

Mrs. William Harvey is sick.

Mrs. Molly Thorpe has been sick.

Mrs. Clarke Moore, who has been suffering with an infected foot, is reported to be improving.

The S.C.A. of Oakville will give a special program Wednesday morning at the school.

The R. A. Crabtree Chapter will meet Wednesday night in the home of R. E. Smith.

Mrs. Lewis Doss had the misfortune to fall Saturday morning from her back steps at her home, and hurt her neck.

Misses Edythe Martin, Thelma Webb and Edgar Martin were dinner guests of Mrs. "Joe" Martin Monday night. The occasion was in celebration of her daughter's birthday.

OAKVILLE JUNIOR 4H CLUB

The Oakville Junior 4H Club had its regular meeting Tuesday, November 12, at 10 A.M. Officers for the coming year were announced as follows:

President, Warren Martin
Vice president, Clayton Martin
Secretary and treasurer, Barbara Smith
Reporter, Josephine Martin
Song leaders, Barbara Smith and Opal Childress.

There are ten boys and girls enrolled this year in the Junior club.

Miss Vivian Clarke, leader, announced the annual 4H Club Christmas party, which will be held on Thursday, December 12. Plans were made for an interesting program. It was voted to invite all of last years members to attend the party, also Mr. and Mrs. Blair.

—Reporter, Josephine Martin.

OAKVILLE SENIOR 4H CLUB

The Oakville Senior 4H Club met Tuesday afternoon, November 12, at 3:30. Officers for 1941 were named as follows: president, Brandfor Lucado; vice president, Richard Bass; secretary and treasurer, Helen Martin; reporter, Ellen Martin.

Miss Vivian Clarke outlined the work for the year and announced a Christmas party. She urged each member to keep records.

—Ellen Martin, reporter.

Mrs. Lizzie Ferguson is visiting in the home of H.C. Almond.

H. B. Marshall continues ill.

The ladies of Salem church will have an oyster, turkey and meat supper at the Spout Spring school Saturday night, November 30, beginning at 5 P.M.

Sneeze by Stroboscope Studied by Scientists

That respiratory diseases may be spread through the expulsion of germs in a sneeze or cough is fairly generally known. With the aid of a comparatively new photographic process, which can take 600 pictures a second, an investigation was underway to determine how widely and rapidly the droplets in a sneeze spread. The investigators hoped their findings would be of some help in the battle against respiratory diseases.

The photographic process used was that invented by Dr. Harold Edgerton of the Massachusetts Institute of Technology. Called stroboscopic photography, the process differs from ordinary photography in that the camera shutter is left open and the light (supplied by a gas-filled tube, or stroboscope) is broken into 36,000 flashes a minute. Impressions are left on the photographic plate each time the light flashes; in ordinary photography the light remains constant and the camera shutter opens and closes.

Heading the research into the common sneeze was one of Dr. Edgerton's colleagues at M. I. T., Prof. Marshall W. Jennison of the department of biology and public health. Using Edgerton's technique, Professor Jennison made several photographs of the effect of a sneeze. Among his early findings:

Near the end of a sneeze, the mouth closes involuntarily and propels at high speed (two miles a minute) a great number of droplets through the restricted opening.

In a single spasm, thousands of droplets ranging down to one two-hundred-and-fiftieth of an inch in diameter are expelled.

The smallest of these drops evaporate but others are left floating in the air. These particles may be distributed to other persons.

Compared with the number of drops issuing from the mouth, those coming from the nose are insignificant.

In general, coughing gives forth fewer but larger droplets than sneezing.

Summers Getting Hotter, Claims Weather Bureau

Many of us incline to grin indulgently when the old folks dash the perspiration from their brows and grumblingly assert that when they were young the weather was pleasant in the summertime and not torrid as it is today. We wink and, like as not, say to ourselves that distant things seem pleasantest, and the only reason why Dad and Granddad imagine those long-gone summers to have been more mild is because they are victims of the very human tendency to forget the unpleasant and recall only the serene and balmy days.

However, we are wrong and the old folks are right. The summers are hotter now than they were when the horseless buggy was an object at which to gape. And if you have any doubt about it, there are the statistics of the weather bureau as ineluctable proof of the fact.

According to the bureau's charts the average summer temperature has jumped by at least three degrees during the last 20 years. This is really a phenomenal advance, and a rise of an average of three degrees means but one thing—that there have been a good many scorching hot days.

The weather bureau is quite frank in admitting that it does not know how to account for this rise in general summer temperature.

How President Resigns

A President or vice president of the United States may resign by signing a written statement of resignation and forwarding it to the department of state—not to the legislative or judicial branch of the government. This procedure is set forth in a federal law adopted in 1792 and still in effect. The law says in part: "A resignation of the office of President or Vice President shall be an instrument in writing declaring the same . . . and delivered into the office of the Secretary of State." No President has ever resigned, but one vice president has—John C. Calhoun of South Carolina. He quit the vice presidency in 1832 in order to become a senator.

Sizing for Rugs

Rugs in constant use frequently lose their shape and just won't lay down because the sizing on the under side has deteriorated. According to the extension service of the University of Nebraska agriculture college, the life of such rugs may be prolonged by resizing them. First thoroughly clean the rug by shampooing and let it dry. Then tack it napside down on the floor and apply a solution of one part glue (one-fourth pound) and eight parts water (two quarts). If the rug is light weight, be sure not to put on so much glue that it penetrates to the right side. After application of the sizing, let the rug dry for 24 hours before relaying.

Accidental Burns

Accidental burns, exclusive of conflagrations, are the only type of home accidents in which more women than men are injured fatally. Fatal burns in the home occur about twice as frequently among women as men.

Mrs. C. G. O'Brien Named Garden Club President

At a recent meeting of the Appomattox Garden Club, the following officers were elected: Mrs. C. G. O'Brien, president; Mrs. C. S. Jenkins, first vice president; Mrs. E. L. Smith, second vice president; Mrs. Ivy Holland, secretary; Mrs. Mildred Alvis, treasurer.

The contitution of the club has been revised to read that any member absent for three consecutive meetings without submitting an excuse, would have their name dropped from the active roll and added to the associate membership roll. It also was decided to limit the membership to fifty.

Hostesses for the meeting were: Mesdames L. Crawley, Harry P. Davis, W. M. Morris and Miss Violet Ramsey.

Lions Club Heard Address By Jay Johns Thursday

Declaring that "Appomattox is an oasis standing as a shrine of peace in a world of war," Hon. Jay Johns pointed to the possibilities for development along unique lines here, in an address to a Ladies Night banquet of the Appomattox Lions Club last Thursday evening.

Mr. Johns pointed to the high favor in which the state of Virginia was held, not only in America but over the world. He stated that this favor, brought many people to the Old Dominion, not only to visit, but to settle and make permanent residents.

Mr. Johns suggested that Appomattox strive to make itself attractive to the hundreds of thousands of visitors who will come here to see the restored Surrender Grounds National Park. "Appomattox should not be just another town, like the thousands tourists see. It should stand apart," he declared.

As the town grows, care should be taken that it grows attractively, he said. Residents should see to it that the right buildings are located in the proper places, that eye-sores are removed, that premises are kept neat and presentable, and the appearance of the town will attract the visitor.

Mr. Johns is chairman of the board of directors of the Virginia Public Service Company. He is also a former president of the Chamber of Commerce of Virginia. He owns Ash Lawn, the famous shrine near Charlottesville.

His address here was very timely, coming as work procedes on the restoration of the famous Surrender Grounds by the National Park Service.

The Lynchburg Lions Club presented a handside metal Lions Club road sign to the Appomattox club. Lion Myers, of Lynchburg made the presentation, and the gift was accepted by president Calvin Robinson of the Appomattox club.

Lions from the Buena Vista, Charlottesville and Lynchburg clubs were guests at the banquet, which was served in the cafeteria room of the high school. During the banquet, a five act floor show was presented. Following the banquet, the annual Lions Club dance was held at Sears, with music by Bill Simos and his orchestra. About thirty-five couples attended the dance.

The committee handling the Ladies night event was composed of: Lewis McDearmon, C. H. Swing, John Taylor, A. R. Harwood Jr. and Robert Lynch.

Capitation tax must be paid six months before town election to be held next June, in order to vote.

BOYS, BUILD YOUR OWN PLANES, TANKS, SHIPS

Here's wonderful news! Now you can build models in full color of Uncle Sam's and Britain's latest fighting craft. Specially designed by a world famous builder of scale models. Look for this feature starting December 1 in the COMIC WEEKLY "PUCK" distributed every Sunday with the BALTIMORE AMERICAN On Sale at All Newsstands

Girls Are Advised To Build-Up For Relief

Lack of knowledge causes many a weak, undernourished girl a lot of suffering!

Many others, however, know how the headaches, nervousness, cramp-like pain of *functional dysmenorrhea* due to malnutrition are helped by the proper use of CARDUI.

Some take it a few days before and during "the time," to help ease periodic distress. But CARDUI'S principal use is to help increase appetite; stimulate the flow of gastric juice; so aid digestion, assist in building up physical resistance and thus help reduce periodical distress. Women have used CARDUI for over 50 years.
